TABLEAU DASHBAORD RUBRIC

Create a dashboard from scratch using a data source of your choice.

- In session I showed you that data visualisation package Tableau. However, for this task you can use a data visualisation of your choice.
- You can pick a dataset from https://www.kaggle.com/datasets or another source of your choice.
- Your dashboard should contain at least 3 different visualisations.
- Once you have created your dashboard, write a summery of your findings.
- You can complete this task independently or you can work within a group.

Marking Criteria

Pass	Merit	Distinction
• Attempts to make one graph from the data source	• Attempts to make more than one graph from the data source	• Made a complete dashboard with several graphics and writes a summary of their findings to a accompany the dashboard
